

# Regular Track Math Courses

## Honors Math Track

Continuation in the Honors track is for students who complete Honors Intermediate Algebra with both term grades of B or higher and have math instructor approval. Most honors students take Honors Elements of Calculus or AP Calculus their senior year.

Transfer to the honors track from the regular track after Intermediate Algebra is not expected. However, in unusual circumstances, those students in the regular track who have completed Intermediate with both term grades of A- or above, and PreCalc II (Trigonometry) with a grade of A- or above, and who gain math instructor and math chair approval, may enroll in Honors Precalculus.

A student must maintain B level work to stay in the honors track.
